

DAY MD, LAMAR PEPPER: TRANSCRIBE, MODIFY, PERFORM, VERIFY  
Event Display: Addendum  
Authored Date: 20211102085739-0400

ADDENDUM:

Additional imaging history was submitted. Patient has had lower extremity venous insufficiency review at outside institution. Imaging is not available for review.

CT venous portion of this study demonstrates venous patency. However CT modality is not appropriate for physiologic assessment relative to the presence or extent of venous insufficiency. As a result correlation with prior venous insufficiency review from outside institution is advised. Alternatively repeat venous insufficiency imaging can be provided as warranted.
